Albany, New York 12203  
30 September 2010

Dear Guilderland Town Board Members,

This letter is a follow-up to my earlier correspondence of 29 August and Mr. Grimm's email response. I am not sure if Mr. Grimm's email was referring to my letter because the subject line was for Linda, (not Lisa). I have attached this and my original correspondence as word documents and the original emails follow below.

Firstly, I would like to thank the Board for their support of McKownville in recent improvements such as the park at Stuyvesant Plaza, the improved drainage at the Western/Fuller intersection and the new lights and crosswalks.

I recently was forwarded an email with the proposed zoning changes and have sifted through to find more particular language to support my earlier points of concern, as requested by Mr. Grimm. Section III Amendments part A in its entirety is of concern, particularly:

C. Is clearly incidental and secondary to the use of the dwelling unit for residential purposes.

E. Shall not generate traffic beyond that normally expected in a residential neighborhood. Any need for parking generated by such use shall be provided in an off-street area, other than in a front yard.

F. Shall not create noise, dust, vibration, odor, glare, fumes or electrical interference detectable by the normal senses of persons outside the dwelling unit. In the case of electrical interference, there shall be no radio or television disruption outside the dwelling unit or fluctuations in line voltages off the premises

Along with the shopping center definition changes these proposals could truly alter the nature of our neighborhood. I am not a lawyer, nor am I well-versed in all the zoning language, but I believe these points clearly support my earlier letter to the Board.

Any change to the definition of a home business has an expected net outcome of more or fewer lots able to be defined as home-businesses; otherwise, why make a change at all. In looking at home businesses along Western in McKownville, the main purpose is clearly business, with home taking a much lesser role. In my opinion, a business is a business with all its concomitant needs, regardless of an apartment upstairs. This, along with reasons cited in my earlier letter, is why I am concerned with the possibility of changing the zoning definition in McKownville, especially along Western Avenue. I realize that the Board is not zoning for cut trees or more paved yards, but this is much more of a likelihood, if not necessity, for any business (visibility and parking) that might be involved.

There are currently three home businesses for sale in the small section of Western between SUNY and Fuller Rd. If a business has difficulty fitting in to the current zoning law, I suggest locating elsewhere, rather than changing the law. We need to keep McKownville residential in nature, not simply the back lot of a strip mall.

Once again, I thank you all for your hard work and support in keeping McKownville the welcoming neighborhood that it is. I urge the Board to consider the proposals made in 2006 McKownville Zoning Committee report. It was well-received then and its recommendations still hold true today.

Respectfully,  
 Lisa Stanziano
